DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-13, drawn to an ostomy applicance cover, classified in class 604, subclass 335.
- II. Claim 14, drawn to an ostomy appliance cover, classified in class 604, subclass 332.
- III. Claim 15, drawn to a method of reducing a displacement tendency of an ostomy appliance, classified in class 604, subclass 317.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions (I and II) and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process for using the product as claimed can be practiced with another materially different product not requiring the specifics of the product claims, e.g. a cover, which claims serve as evidence claims.

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination of the Group II claims do not require the particulars of the subcombination claims of Group I because the combination of the Group II does not require the specifics of the Group I claims which serve as evidence claims. The subcombination has separate utility such as a wound cover.

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification which would lead to diverging fields of search, restriction for examination purposes as indicated is proper.
- 4. A telephone call was made to Mr. Frederick A. Kaseburg on February 22, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karin M. Reichle whose telephone number is (571) 272-4936. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Larry Schwartz can be reached on (571) 272-4390. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
